WinZoom Lite

This program is a small tool that enlarges the desktop icons, text, background and the cursor as well as it works with windows maximizing and minimizing. It can use any shell or window manager. The program uses no external daemons or daemons will be written to a user home directory. Therefore the user does not need to worry about installing additional daemons after running this program. The main program window can be maximized at any time and the position of the program window can be specified in the configuration. The program is designed for human touch users and does not require any graphic processing. In contrast to the picture zoom mode of most other mouse extenders, the window and the icons in the picture are resized proportionally so that the picture does not get larger than the window. The main advantage of the windowing driver and the close-window-on-deactivation flag, is that the program can be minimized. New version of MXGLTools is released. Lilu Lite Lilu Lite is an easy to use, lightweight and fast control panel for Windows that can be easily installed on the desktop. It is capable of controlling the mouse, windows, icons, and mouse wheel. Lilu Lite can control a number of functions on the screen. It can be used to quickly access all your favorite files and folders, and to organize them easily. The program also includes a bug-proof launcher. Lilu Lite comes with extensive customization features so you can modify it to suit your needs.

Lilu Lite Features: Screenshots: WinZoom Lite WinZoom Lite is a powerful tool that was especially designed to provide users with a means of enlarging the screen icons, text and, in general, increase the visibility of the desktop. The program supports a magnification factor up to 4x and has some customizations for mouse cursor size and full screen or lens view. WinZoom Lite Description: Hit Manager Lite Hit Manager Lite is a lightweight and straightforward program. This software is designed to kill windows that are not really yours. The program does so by displaying an exclamation mark at the titlebar of the hovered window. Hit Manager Lite can be installed and configured in seconds by providing one of the many application sets. With its help you will be able to customize the program in just a few minutes. The user interface is highly configurable. You are allowed to choose from various application sets for controlling Windows. They range from very basic packages like Kick Manager Lite, a simple program that kills any other application, allowing you to surf the net without being bothered, to more sophisticated versions that let you set rules for each application. Another aspect to consider is the fact that the default configuration features can be easily changed or modified. For example, you can easily change the program shortcut, for example, by creating your own shortcut with a different name and/or place it in the system directory. No problem is too much for Hit Manager Lite. You also have the option of changing the appearance of the program by adding new themes.
