***Developing-related applications:** The two other top applications for image-editing are Adobe Lightroom, which is used to archive images, create book covers, and edit slideshows, and Adobe InDesign, which enables you to create books, brochures, magazines, and slide shows. ***Graphics and media:** Adobe Acrobat Pro, Adobe Animate, Adobe Premiere Pro, Adobe After Effects, Adobe Media Encoder, Adobe XD, and Adobe GoLive enable graphic designers to create a variety of media formats. They also enable users to produce and edit movies, animation, and video. If you're new to Photoshop, you'll probably find the learning curve steep. Don't feel bad, though. We've worked through many of the topics in this chapter and will help you work your way through them. # TURNING ON THE CODE If you're a first-time Photoshop user, you may be wondering why there's a "code" layer and some type of bar at the bottom of the screen. You may also be wondering where to find the Tools panel. These are only a few of the questions you may have about Photoshop. ## Why Are There Layers? Photoshop enables you to create new images one layer at a time. The biggest advantage of this approach is that you can combine images and give them new life at the click of a button. Figure 3-2 demonstrates just how simple it is to make this transformation. FIGURE 3-2: Layer masks make blending images a snap. A _layer mask_ is a special visual effect that you can apply to any single layer or a group of layers. The mask allows you to hide parts of the image or reveal them by painting over the layer mask itself. Then the hidden parts of the layer mask appear as black areas. If you delete a layer, the information it contains is lost. Layer masks, however, are saved with each layer and reappear when you open an image again. If you're used to working on print projects, you may be familiar with the term _keyhole_ which is used to describe a specific part of a product that a customer can select and add a special value to. The same concept applies to a layer mask and the _keyhole layer_. You can fill or paint the mask with any value you choose, including your logo, text, gradient fills, and color combinations. ## Where

By now, readers of our blog know that we are all about the cars and the bikes that has to do with them. So we are not surprise when we hear of a new restoration project by a German car collector. A German car collector is bringing in a Ferrari 250LM after its restoration for 115.000 € in it to get the motor out of the museum. And this is not the only impressive and high-tech project coming up with unusual transport vehicles. Find out more after the jump. A fantastic black Ferrari 250LM arrives at the Villa Igea Fini in Sicily, where it will be made ready for a public show. This is not the first time we see a Ferrari 250LM sitting in a museum. Due to the art-deco appearance of this motor on a collection of Fords and Isuzus, and most notably the Ferrari 250LM on display in Detroit, many people believe that the F430 too is an art-deco car. The Ferrari 250LM is a pretty rare model. What should be noted is that the 250LM was considered too radical for its time and was never released to the public. As a result, only ten were ever built, and of those, only three were sold to private owners. The most notable of those private owners was Prince Aly Khan, an unofficial member of the British royal family who owned the car for many years. Upon the owner's death in 1953, the 250LM, along with other valuable assets, was buried with him, and for the next half century, remained in the castle's basement. In 2000, the Vianney Stuck collection began excavating a different part of the castle, and while they were there, they found the Ferrari 250LM. It now sits in it's repository in Sicily and is in very good condition. The Ferrari 250LM was built by the Pininfarina designers. It was based on the 348 of the same year, which was built to compete with Maserati. However, it was driven by several notable race car drivers of the time, including John Surtees and Phil Hill. Both raced in the 1957 Mille Miglia, and that motor won that race. The hand painted body and interior of this 250LM was very rare. The livery is similar to that of the 1948 Alfa Romeo 20TC that had sold at a Christie's auction in London for \$2.4

Consiliul Național al Audiovizualului (CNA) a decis să constate inadmisibilitatea unei achiziții de imobile pe bani publici în cazul S.C. „Deși Primăria Capitalei a apelat la Uniunea Europeană și la procedura în cadrul Fondului European de Dezvoltare Regională pentru a obține finanțare europeană pentru a demolata tot orașul, după mai mulți ani, se face achiziție imobiliară a unor apartamente de tip 3+1 și fără utilități, înregistrându-se atât prețuri tot mai mari, cât și amenzi foarte mari pentru pădurar și firme de construcții care au plecat cu imobilul, în loc să restituie imobilul în proprietatea publică, iar acesta să fie restituit în trei luni de la data achiziției”, a declarat Radu Mazare, președintele Consiliului. De asemenea, CNA a mai decis să aplice sancțiuni civile în cazul în care să fie ignorate prescripțiile normale de funcționare. „CNA constată inadmisibilitatea și, în conformitate cu prevederile art. 52 alin. (4) și art. 81 alin. (1) din Legea nr. 83/2010 privind sistemul integrat de management al construcțiilor publice și titluri de proprietate, să pună la dispoziția publicului orice document sau tranzacți
