It would need to support PCIe 2.1 4x for the new gig. The slot can support 32x, 64x, etc. (along with chips of other sizes). So, you will need to do it manually, using custom images, or a device with a ROM that handles all the details. (We'd love to help.) In other words, this is a software task.  & The Dishonorific Question This video offers some lengthy and appalling reasons for the hot mess that is our school system. The below graphic identity includes video clips that are deliberately not in sync. (But really, is there any other kind?) REVIEW: One of our most coveted titles, "One of the "Forks" is. But before you get too excited, read. JOHN: We're going to take you back to a very, very familiar place. We're going to sneak in under the two covers of a bed, so you'll have to face the light of day. [CHICKENS] JOHN: Hey, you chickens. I'm going to use an awful lot of salt today. The word "salt" comes from the Arabic sault, meaning "rock" or "stone." Salt has been used as a preservative for various foods and spices for centuries. The word "salted" describes food that has been seasoned with salt, such as by rubbing it with sea salt, or by sprinkling it with kosher salt. FARE: And so, we in public education, have been salting our schools, for some time now, for decades. We salt our public school system because we are afraid, what happens on one campus, stays on one campus. So, we salt the school. By that, we take the best and the brightest of students and leave them to train other young minds. We salt our schools, we salt the standards, we salt the tests, we salt… JOHN: Hey, Mr. Farmer. So, where are those drugged up, do-nothings that I hear about? I'm going to need to sleep soon. GRANDPA'S DEAD ASS MARVIS: I don't know, John. I have kids. I need to control those. [CLICK] JOHN: What was that? MARVIS: You had a grandson, John. JOHN: What was that? MARVIS: You had a grandson, John. JOHN: You were always saying things about my family. What did you say? MARVIS: I told ya, you had… JOHN: My family? MARVIS: Yeah. You had a grandson. JOHN: They told me I had

Street Champ VR is a bullet-hell VR arcade action game set on a giant freeway in our not-so-distant future. Your goal is to fly through the digital as fast as you can and avoid the oncoming traffic, which are represented in VR by real-time moving cars. Aiming is done by the Arrow keys or Touchpad. An incredibly high number of cars are coming towards you in all directions from all sides of the environment and all you have to do is focus on the lanes. It's VR frogger, but better than any current VR frogger game. Learn more about the characters and story. Note: Not all VR games will work on all VR systems. Please provide feedback and report any issues. The story of Street Champ VR: Several years ago, we made Street Champ VR as a way to get VR developers and people interested in the technology to test how well it worked. Street Champ VR is still a combination of a tech demo and a practice game. One of our hopes was that it would work as a technology that would spark more developers creating VR games. That said, we still continue to release updates to the game every once in a while. We're currently working on the upcoming release of the "Ultra" version of Street Champ VR which will include several new features and optimizations to enhance the already high quality VR experience. The Ultra version of Street Champ VR will be released sometime this year for free for current users. Keep an eye on the development blog for updates on Street Champ VR: This game is not an official, licensed, endorsed or created by the company and/or games depicted herein.
