Zafehouse Diaries is a romantic story of love and loss that explores family, friendship, and the power of the human heart. In an interconnected world where the limits of perception are unknown, a young man and woman fall in love despite the countless tragedies that have befallen them in the five years since their last meeting. We've decided to give another chance to the world of play that was such a delight for us with the first game, Zafehouse Diaries. In the sequel to that short but heartfelt platformer, our young couple will face new adversities, some of which will lead to the couple splitting, but these events will happen in a world that is more interconnected than ever before. In Zafehouse Diaries 2, you'll play as Kazuya, a young man from the town of Rizomae. You'll be able to continue the story from where you left off in the first game, as Kazuya must face the consequences of the choices he made in the first game, be it good or bad. If you're a fan of narrative adventure games, think you're a hard-boiled gamer, and you want to check out a game that's pushing the envelope in the storytelling department, then Zafehouse Diaries 2: The Sun Also Rises is the game you'll want to check out. We got a chance to sit down with the game's director, Tero Virtala, and he poured his heart out about the game and gave us an insight into the development of the game. Zafehouse Diaries 2: The Sun Also Rises was published on Steam on August 14, and is currently available for $22.99 or €23.99. We asked Tero to answer the following questions for the site, and we've edited the answers down to their most essence. 1. What sets this title apart from other narrative adventure games that are already on the market? Tero: When I started to work on this

game I thought of telling a love story about a difficult girl and a supportive boy, and about a world that is connected and kind of free-roaming. I really love the idea of love stories and I think in this time there is not a lot of kind of love stories. In western cultures we don't see a lot of relationship between a man and a woman that really work

Links E6 is a product of Activision Publishing, Inc. All rights reserved. I am developing my own version in as3. I am looking to build a plugin for it to allow link shopping. It is already possible to create links with as3 (With my help) but i was wondering if someone had written a simple link shopping plugin for as3? I will be writing my own version of it but it would be good to see if someone has already created one. A: I may be a bit late to this discussion but...I've done this myself a few times for a project I was working on. First, the logical place to start is to search Google for "as3 ecommerce cart". As you might imagine, there are a lot of results. Once you figure out what you're trying to do it should be relatively straightforward. (If it's not then you might consider dropping by the as3.net forums - I think they're pretty helpful.) The second you get a handle on what you're doing, you should be able to find a good tutorial on how to do it. Good luck!
