STORY: In a society known only as "Earth" or "Sky" depending on who you ask, you exist to conduct research on the effects of "Sky" upon "Earth". This society exists entirely within a VR simulation of the Earth, which is fed data from the real Earth via the Moat Tube. You conduct your studies of "Sky" by traveling the planet in the Moat Tube, which is capable of transporting people as well as virtual reality "dolls" (simulation of living beings). You have an extended mission, which will take several months to accomplish. Only you and a few others from your crew know of this mission. In the meantime, you are conducting your research and logging all important information.

GAMEPLAY

Starry Moon Island 2 Red Snake is a non-violent, role playing adventure where you are the leader of your crew. You must choose your own team of fellow researchers and companions to help you on your mission to uncover the secrets of "Sky". You have six categories to focus on, each of which serves a different purpose during your voyage. By default, you are pursuing the secrets of "Sky" and saving "Earth", but can go down the rabbit hole and pursue alternate, occult, scientific, and political theories of the world. We wanted to create a world where

people can live inside their imaginations and create things that just aren't possible in "Real Earth", and in doing so, create something that isn't an escape from reality, but a reflection of the true nature of reality. We have so many unique, virtual reality features, such as teleportation, that we wanted to explore them and make them fun in a new game! We set the stage, but the story is in your hands.

Accessibility information: The Interfacing GameplayToggle any of the navigation modes by pressing and holding on the corresponding mode button. To navigate the interface you'll need to press and hold on the direction arrows on the nav bar. They look like they move so don't hold your breath on that one! *Note:* This tutorial will be viewable when the game is launched for the first time and can be skipped.

Moonshine Island 2 Episode 4: STORY: You are an Overseer, and have the best job in the world. Not only do you make sure that no one murders each other or kills themselves, but you make sure that everyone's in perfect health and have the finest environments to live in. But it's not a dream job, and you must do your

What's new:

Zero is a survival horror game with RPG elements. Venture into the abandoned high school with your best friend, Chris, and collect items, explore the environments, and get to the bottom of what happened that day. Stephen's lead design and writing. And if I can make a listicle I can make an article too. Denis my in-game voice acting. I wish we had more than one of each so he could do both of our lines. My husband, Stephen, doing test levels with me as I did all his audio on NDA. Nicole, me, and Denis together at PAX East 2018. Art by Nebojsa. Music by Ookami Shoujo by the Arcade Score Four. If you want to play the game, maybe drop me a line in Discord or Twitter. I'm looking for my best friend, Chris, who I'm quite curious as to what happened to him after that fateful afternoon. Thanks for reading and let's do this thing. Day 0 (Beginning) Welcome to the Horizon Zero: Dawn Nightmare Edition. This version is patched and updated to the 0.5.0 release, and already supports Hardcore. The whole reason I'm releasing this is I just want to see what happens if I wanted to teach myself how to make a hardcore RPG from scratch. Not officially, though. Just for curiosity. I started writing this game in 2014 as a personal project. Back then, I was working as a Sega Saturn game tester, and I had learned how to program in Java 2 years earlier, so I thought I'd give it a go. I also remember having a blast with a little game I made using a Solar System Simulation game engine I found on sourceforge which went into the first iteration of this game. Some of you might remember that game as Razor Python. I'd love to see a revival of that! It's still my most profitable indie game, earning an average of \$15,000 per month. But I digress. I was really naive about looking for sales numbers, though. I started by selling my game as a standalone separate game and I hoped I'd get some more profit out of it. I tested the game by selling my Saturn, I played a lot, I covered my own development costs. But then I
