The use of the Introduction By browsing the Web, the user may often come across specially formatted web pages that contain information of interest. For example, such pages may contain information on airline fares, sports scores, and stocks. The author of a web page, or the web site itself, may wish to advertise information about a specific product in a web page that will lead the user to the product's official web site. The purpose of this article is to show how to create and use web advertisements. To do this, we will create a new web page with the Add Web Page command in Internet Explorer. Instructions To begin, we will create a new web page, and then we will put some advertisements on that page. Introduction Two or three years ago, the International Energy Agency predicted that fossil fuels would dominate the energy mix for at least the next 40 years and that this would lead to unprecedented increases in global temperatures. As late as last year, when the world's climate talks were under way in Kyoto, Japan, the IEA had still stuck to that prediction. Then, in the run-up to the Copenhagen climate change summit, the agency revised its projections. The new forecast is that the global temperature could rise anywhere between 2 to 8 degrees centigrade by the end of the 21st century. The average temperature rise would be between 2.5 and 5.2 degrees. The agency has given the world a decade to limit the rise in temperature to 2 degrees centigrade and if we fail to do so, it will be too late to stop the disaster of climate change. Despite the controversy, the new forecast has put the world on notice that global warming is going to happen. When I was a boy, I never cared much for computer games. I preferred playing sports, reading, and having fun. So when the Apple Newton came out, it was too late for me. The product was clearly an excellent piece of work, and I thought it was the future of computing. The product was released in 1993, a year before I turned 17. After that, I was hooked on the Newton. It was easy to use, simple to navigate, and very powerful. It was one of the first personal digital assistants, and it was even equipped with handwriting recognition. Unfortunately, due to the lack of funding for new software, the Newton was discontinued in 1997, and was replaced by the Palm Pilot, an even more powerful device, but with a much more complex user interface. On the bright side,
