What's New in the Enhilex Medical Transcription Software?

Enhilex Medical Transcription Software is a great word list tool built specifically for MTs. Increase your productivity and easily manage patient names, doctor names, medications, medical abbreviations, lab tests and more! Includes Sort by Filename, Sort by First Letter of Filename, Sort by Last Letter of Filename, Sort by Text Length, Sort by Text, Sort by Extension, Sort by Case, Sort by Title Case, Sort by Capital Letters, Sort by Small Letters, Sort by Words of Characters, Sort by Sentence, Sort by Pronouns, Sort by Punctuation, Sort by Words of Sentence, Sort by All Words, Sort by Count and Sort by Keywords. These options are unlimited. * It will process the entire database and allows the files to be sorted once in the order you choose. * It also has a silent mode that allows you to continue working while the program processes your database. * Easily access the Sort by Word menu without leaving the program window. * Easily access the Sort by File Name menu without leaving the program window. Enhilex Medical Transcription Software has been tested on Windows XP, Vista and Windows 7. ***If you have a database with a very large number of files (1M+), make sure that you configure the program to automatically start the sort once the database is completely processed. If you leave it as it is, the software will take a long time to finish processing the database, and you may have to manually run the sort after a while. ***If you encounter any errors in the software, please submit a bug report to the Support Center. ***Enhilex is a trademark of Enhilex Ltd. ***All images in this description are represented by an illustration of the product being described. Enhilex Medical Transcription Software Overview: Enhilex Medical Transcription Software is a great word list tool built specifically for MTs. Increase your productivity and easily manage patient names, doctor names, medications, medical abbreviations, lab tests and more! Includes Sort by Filename, Sort by First Letter of Filename, Sort by Last Letter of Filename, Sort by Text Length, Sort by Text, Sort by Extension, Sort by Case, Sort by Title Case, Sort by Capital Letters, Sort by Small Letters, Sort by Words of Characters, Sort by Sentence, Sort by Pronouns, Sort by Punctuation, Sort by Words of Sentence, Sort by All Words, Sort by Count and Sort by

Keywords. These options are unlimited. * It will process the entire database and allows the files to be sorted once in the order you choose. * It also has a silent mode that allows you to continue working while the program processes your database. * Easily access the Sort by Word menu without leaving the program window. * Eas
